

STATEMENT

REACH Compliance Statement for the SVHC 173 List released on January 12th, 2017.

The EU regulation EC 1907/2006 which covers the Registration, Evaluation, Authorization and Restriction of Chemical substances is an EU regulation that became effective on 01 June 2007.

The purpose of this legislation is to ensure human and environmental health by regulating Substances of Very High Concern, or SVHC's. These substances are listed in the REACH legislation available at: <http://echa.europa.eu/web/guest/regulations/reach/>

Spark Holland BV is a downstream user of any SVHC substances that are used in supplied parts for our products. Based on declarations from our suppliers no SVHC substances are used in supplied parts for our products. Spark does not add any SVHC substances during its manufacturing processes.

To the best of our knowledge none of the end products we produce for our customers have any SVHC substances in concentrations above the minimums contained in the legislation, typically < 0.1% w/w.

Spark Holland will continue to monitor its suppliers, and if any substances begin to be included in our products that require registration, we will inform our customers according to the REACH legislation.

Issued on behalf of Spark Holland BV by:

H.P. Karman
QA & Compliance Manager
