

REACH 235-SVHC DECLARATION OF CONFORMITY

This declaration concerns the EU regulation (EC) 1907/2006 covering the Registration, Evaluation, Authorization and Restriction of chemical substances that became effective on June 01, 2007. The purpose of this legislation is to ensure human and environmental health by regulating the use of Substances of Very High Concern (SVHC).

Spark Holland BV is a downstream user of any SVHC substances that are contained in parts supplied for our products. Spark does not add any SVHC substances during its manufacturing processes.

Based on supplier part and raw material declarations, Spark Holland BV declares, under its sole responsibility that products, supplied to our customers, do not contain any of the substances listed in the 235 SVHC Candidate List published on June 14th, 2023, more than < 0.1% w/w except for Lead (Pb) [EG 231-100-4].

Lead is used in some Spark products as part of solders and electronic components in applications exempted by the RoHS directive 2011/65/EU Annex III: 7(a) and 7(c)-I.

The weight of substances listed in SVHC Candidate List contained in Spark products imported into the EU does not exceed one metric ton per year and annual reporting to ECHA is not required. Spark Holland will continue to monitor its suppliers, and if any SVHC substances begin to be included in our products, we will inform our customers according to the REACH legislation.
