

EU REACH 253-SVHC DECLARATION OF CONFORMITY

This declaration concerns compliance with Regulation (EC) No. 1907/2006 (REACH), which governs the Registration, Evaluation, Authorization, and Restriction of Chemicals within the European Union. The regulation aims to ensure a high level of protection for human health and the environment by identifying and controlling Substances of Very High Concern (SVHC).

Spark Holland B.V. is a downstream user of chemical substances and does **not** intentionally add any SVHCs during its own manufacturing processes. Any SVHCs present in our finished products originate solely from materials and components provided by our suppliers.

Based on the latest available supplier declarations and material assessments, Spark Holland B.V. declares, under its sole responsibility, that its products **do not contain any substances listed on the ECHA SVHC Candidate List updated on 4 February 2026 (253 substances) above the threshold of 0.1% weight by weight (w/w), except for Lead (Pb)** [EC 231-100-4 / CAS 7439-92-1].

Lead (Pb) may be present in limited applications such as solder and certain electronic components. Its use remains **exempted under RoHS Directive 2011/65/EU, Annex III (exemptions 7(a) and 7(c)-I)**. These exemptions cover high-temperature solders and lead in specific glass/ceramic electronic components.

Furthermore, the total quantity of SVHCs present in all Spark Holland products imported into the European Union remains **below one metric ton per year**, meaning **no Article 7(2) notification to ECHA is required**.

Spark Holland B.V. continuously monitors updates to the SVHC Candidate List and supplier material declarations. Should any newly identified SVHC be found in our products above applicable thresholds, we will promptly inform our customers in accordance with REACH Article 33 obligations and, where applicable, submit SCIP notifications under the EU Waste Framework Directive.
